Schedule: 1

Project Description and Scope of Project

1. Description of the Transmission Scheme

M/s NPCIL have submitted applications for grant of Connectivity & LTA for KNPP Unit-3&4 and application for grant of connectivity for KNPP Unit-5&6 under the CERC Connectivity Regulations, 2009. The transmission system for evacuation of power from KNPP-3&4 and KNPP- 5&6 was finalized during Joint Study meeting of Southern Regional constituents held on 22-23 Feb 2023, at SRPC, Bengaluru.

Subsequently, with the notification towards effectiveness of CERC GNA Regulations, 2022, M/s NPCIL opted for transition under the GNA Regulations for KNPP-3&4 (2x1000 MW) only.

As per the Govt. of India policy, which was notified on 19.07.2022 towards implementation of intra-state transmission lines for drawl of its share allocation from CPSE generating stations provides that "in case the State, where the CPSE generating Station is located, needs to draw the free power / their share from the generating station, they can plan and build the Intra State transmission lines of required capacity at their own cost. This will relieve them from using the ISTS network for drawal of their share and thus, will not have the burden of paying the iSTS charges".

Accordingly, the transmission system for KNPP Unit - 3&4 was identified under the scope of ISTS and TANTRANSCO. The transmission system under the scope of TANTRANSCO shall facilitate in drawl of its share allocation from Kudankulam Unit-3&4. The transmission system under the scope of ISTS shall facilitate in evacuation and transfer of power to other beneficiaries from Kudankulam Unit-3&4 generation project. The identified transmission system under ISTS shall be implemented with the time frame of Kudankulam Unit-3 i.e. by Dec, 2026 as sought under the Connectivity / GNA application.

The transmission scheme was discussed in the 25th CMETS SR held on 28.11.2023. The scheme was discussed and agreed in the Joint Study meeting held on 21-22nd December 2023 at Yelahanka, Bengaluru. The scheme was also discussed and agreed in the 49th SRPC meeting held on 08.12.2023.

The National Committee on Transmission in its 18th meeting held on 05.03.2024 has recommended the implementation of the subject transmission scheme through TBCB route.

Ministry of Power vide Gazette notification dated 15.03.2024 has appointed PFC Consulting Limited as BPC for bidding of the subject scheme through TBCB route.

Appendix –IV to Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2024

Procedure for Calculation of Transmission System Availability Factor for a Month

- 1. Transmission system availability factor for nth calendar month ("TAFPn") shall be calculated by the respective transmission licensee, verified by the concerned Regional Load Dispatch Centre (RLDC) and certified by the Member-Secretary, Regional Power Committee of the region concerned, separately for each AC and HVDC transmission system and grouped according to sharing of transmission charges. In the case of the AC system, transmission System Availability shall be calculated separately for each Regional Transmission System and inter-regional transmission system. In the case of the HVDC system, transmission System Availability shall be calculated on a consolidated basis for all inter-state HVDC systems.
- 2. Transmission system availability factor for nth calendar month ("TAFPn") shall be calculated by considering the following:
 - AC transmission lines: Each circuit of AC transmission line shall be considered as one element;
 - ii) Inter-Connecting Transformers (ICTs): Each ICT bank (three single- phase transformers together) shall form one element;
 - iii) Static VAR Compensator (SVC): SVC, along with SVC transformer, shall form one element;
 - iv) Bus Reactors or Switchable line reactors: Each Bus Reactors or Switchable line reactors shall be considered as one element;
 - v) HVDC Bi-pole links: Each pole of the HVDC link, along with associated equipment at both ends, shall be considered as one element;
 - vi) HVDC back-to-back station: Each block of the HVDC back-to-back station shall be considered as one element. If the associated AC line (necessary for the transfer of inter-regional power through the HVDC back-to-back station) is not available, the HVDC back-to-back station block shall also be considered unavailable;
 - vii) Static Synchronous Compensation ("STATCOM"): Each STATCOM shall be considered as a separate element.
- 3. The Availability of the AC and HVDC portion of the Transmission system shall be calculated by considering each category of transmission elements as under:

Central Transmission Utility of India Limited

102

TAFPn (in %) for AC system:

Where,

o = Total number of AC lines.

AVo Availability of a number of AC lines

p Total number of bus reactors/switchable line reactors

AVp Availability of p number of bus reactors/switchable line reactors

q1 = Total number of ICTs

AVq 💮 Availability of q number of ICTs

r = Total number of SVCs |

4. The availability for each category of transmission elements shall be calculated based on

$$\sum_{i=1}^{n} Cxh \mu + \sum_{j=1}^{n} Cyh th$$

Where

Cxbp(act) = Total actual operated capacity of xth HVDC pole

Cxbp Total rated capacity of xill HVDC pole

AVxbp = Availability of xth HVDC pole

Cybtb(act) = Total actual operated capacity of yth HVDC back-to-back station block

Cybtb = Total rated capacity of yth HVDC back-to-back station block

AVybtb = Availability of yth HVDC back-to-back station block

s = Total no of HVDC poles

Total no of HVDC Back to Back blocks the weightage factor, total hours under consideration and non-available hours for each element of that category. The formulae for calculation of the Availability of each category of the transmission elements are as per Appendix-V. The weightage factor for each category of transmission elements shall be considered as under:

Central Transmission Utility of India Limited

- (a) For each circuit of the AC line The number of sub-conductors in the line multiplied by ckt-km;
- (b) For each HVDC pole- The rated MW capacity x ckt-km;
- (c) For each ICT bank The rated MVA capacity;
- (d) For SVC- The rated MVAR capacity (inductive and capacitive);
- (e) For Bus Reactor/switchable line reactors The rated MVAR capacity;
- (f) For HVDC back-to-back stations connecting two Regional grids- Rated MW capacity of each block; and
- (g) For STATCOM Total rated MVAR Capacity.
- 5. The transmission elements under outage due to the following reasons shall be deemed to be available:
 - Shut down availed for maintenance of another transmission scheme or construction of new element or renovation/upgradation/additional capitalization in an existing system approved by the Commission. If the other transmission scheme belongs to the transmission licensee, the Member Secretary, RPC may restrict the deemed availability period to that considered reasonable by him for the work involved. In case of a dispute regarding deemed availability, the matter may be referred to the Chairperson, CEA, within 30 days.
 - Switching off of a transmission line to restrict over-voltage and manual tripping of switched reactors as per the directions of the concerned RLDC.
 - Shut down of a transmission line due to the Project(s) of NHA!, Railways and Border Road Organization, including for shifting or modification of such transmission line or any other infrastructure project approved by Ministry of Power. Member Secretary, RPC may restrict the deemed availability period to that considered reasonable by him for the work involved; Provided that apart from the deemed availability, any other costs involved in the process of such shutdown of transmission line shall not be borne by the DICs.

Provided that such deemed availability shall be considered only for the period for which DICs are not affected by the shutdown of such transmission line.

- 6. For the following contingencies, the outage period of transmission elements, as certified by the Member Secretary, RPC, shall be excluded from the total time of the element under the period of consideration for the following contingencies:
 - i) Outage of elements due to force majeure events beyond the control of the transmission licensee. However, whether the same outage is due to force

104

Central Transmission Utility of India Limited

majeure (not design failure) will be verified by the Member Secretary, RPC. A reasonable restoration time for the element shall be considered by the Member Secretary, RPC, and any additional time taken by the transmission licensee for restoration of the element beyond the reasonable time shall be treated as outage time attributable to the transmission licensee. Member Secretary, RPC may consult the transmission licensee or any expert for estimation of reasonable restoration time. Circuits restored through ERS (Emergency Restoration System) shall be considered as available;

- ii) Outage caused by grid incident/disturbance not attributable to the transmission licensee, e.g. faults in a substation or bays owned by another agency causing an outage of the transmission licensee's elements, and tripping of lines, ICTs, HVDC, etc., due to grid disturbance. However, if the element is not restored on receipt of direction from RLDC while normalizing the system following grid incident/disturbance within reasonable time, the element will be considered not available for the period of outage after issuance of RLDC's direction for restoration:
- iii) The outage period which can be excluded for the purpose of sub-clause (i) and (ii) of this clause shall be declared as under:
 - a. Maximum up to one month by the Member Secretary, RPC;
 - b. Beyond one month and up to three months after the decision at RPC;
 - c. Beyond three months by the Commission for which the transmission license shall approach the Commission along with reasons and steps taken to mitigate the outage and restoration timeline.
- 7. Time frame for certification of transmission system availability: (1) The following schedule shall be followed for certification of availability by the Member Secretary of the concerned RPC:
 - Submission of outage data along with documentary proof (if any) and TAFPn calculation by Transmission Licensees to RLDC/ constituents
 - By the 5th of the following month:
 - Review of the outage data by RLDC / constituents and forward the same to respective RPC – by 20th of the month;
 - Issue of availability certificate by respective RPC by the 3rd of the next month.
